GARDEN SAUNAS & TUBS

"Panorama" Sauna

Hot Tub BW-19

"Diabaz" Stove

Life Polska opens a magical world of fortitude, healthy body and pure-mindedness. We propose a lifestyle, cultivated for centuries, aimed at health and vitality. Welcome to the world of garden saunas and tubs.

All our devices can be controlled by Iphone via Wi-fi.

SAUNA TYPE : 'HORYZONT' SAUNA

"DIABAZ"
WOOD-FIRED STOVE

"HARVIA"
ELECTRIC HEATER

The "Horizon" sauna is another of our projects that multiplies the enjoyment of the benefits of sauna. Its modular design allows for any configuration of space, starting with the size of M2 and up to M6. The interior of the sauna can be freely divided into vestibule and sauna in 2+2, 2+3, 2+4, 3+3, and other configurations. The sauna doors can be installed in any module. The modular design of the sauna allows for its construction in the following sizes: M2, M7, M8.

EQUIPMENT

Equipment: stove with stack and rocks, benches, stainless steel bands, internal platform, natural non-treated wood, external glass door. For the remaining equipment elements, see: sauna accessories.

SAUNA TYPE : 'PANORAMA' OVAL SAUNA

"DIABAZ"
WOOD-FIRED STOVE

"HARVIA"
ELECTRIC HEATER

We own and offer our unique in-house solution of wall log joints which prevents the penetration of water, precipitation and prevents the effects of wood drying out, which is significant for the life of the sauna. Our key joint is protected with the law of Republic of Poland – we were the first in the world to apply this solution. The vertical walls are made of laminated wood (water-proof joint).

EQUIPMENT

Equipment: stove with stack and rocks, benches, stainless steel bands, internal platform, natural non-treated wood, external glass door, internal glass door. SO-OP sauna with convex polycarbonate glazing. For the remaining equipment, see: sauna accessories.

SAUNA TYPE : "BARREL" GARDEN SAUNA

VESTIBULE

ADDITIONAL ROOF

EQUIPMENT

The "Diabaz Tower" stove is our in-house design. It is ideal for direct pouring of water as well as it maintains a required humidity by means of a dosing evaporator. The inspection hole and feed are situated outside, which prevents bringing the fuel into the sauna and ventilating it unnecessarily. The external operation of the stove prevents the access of fumes inside.

ROOF SHEET COLOUR

Ausstattung: Herd mit einem Kamin und Steine, Bänke, Edelstahlbänder, interne Plattform, natürlich imprägniertes Holz, hölzerne Außentüren.

SAUNA TYPE : HOUSE SAUNA

"DIABAZ"
WOOD-FIRED STOVE

INSIDE
THE SAUNA

EQUIPMENT

Our saunas are made with specially selected spruce, Siberian cedar, larch or thermally modified wood of the highest quality. Nearly 5 cm of thickness ensures sufficient insulation even during severe frost. Our sauna heats up to a temp. of 80-110°C within approximately 30-45 minutes regardless of the ambient temperature.

The standard height of the house-sauna is 220 cm. Equipment: stove, benches, glass door, natural non-treated wood, wooden self-supporting base, wooden floor, sheet or shingled roof. For the remaining equipment, see: sauna accessories.

SAUNA TYPE : MOBILE SAUNA

SIMPLE MOBILITY

TWO BENCHES

Your sauna can go everywhere you go. Take it wherever you want: to an event, meeting, birthday party – or rent it out. A mobile sauna is a great business and outdoor activity idea.

EQUIPMENT

Equipment: stove with stack and rocks, benches, stainless steel bands, internal platform, natural non-treated wood, external glass door.

SAUNA TYPE : INDOOR SAUNAS

**"DIABAZ"
WOOD-FIRED STOVE**

**"HARVIA"
ELECTRIC HEATER**

Indoor saunas are made from natural dried and seasoned wood. Wood contains resins and has knots, which makes the sauna experience healthier and more fragrant.

EQUIPMENT

Equipment: stove with rocks, benches, internal platform, ventilation, natural non-treated wood, external glass door. The price is provided for 1 m² of sauna (the minimum order is 1.6 m²).

SAUNA INTERIOR

WOODEN COLD TUBS

Cold tubs are also manufactured of exotic wood such as Iroko. Cold tubs may be equipped with taps with shower heads, automatic filling or automatic water drain plug. All metal elements – as in all our products – are made of stainless steel.

EQUIPMENT

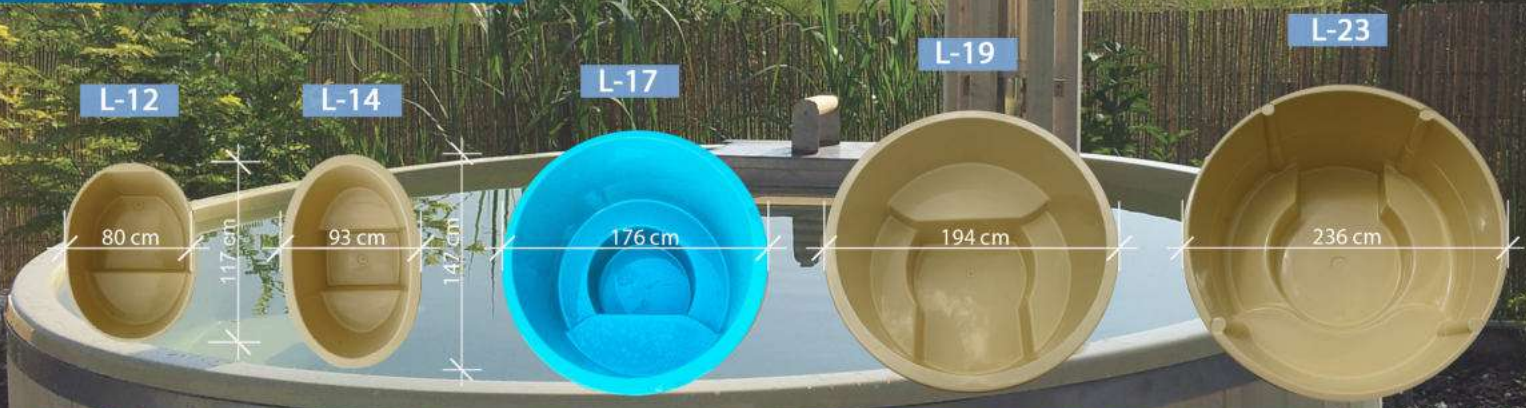

Equipment: laminate bench, stairs, stainless steel bands, natural non-treated wood. For the emaining equipment, see: cold and hot tub accessories.

* Possibility to select any RAL colour upon additional payment.

HOT TUBS FOR
YEAR-ROUND THERMAL BATHS

STURDY 25MM FLOOR

OPTIONAL: HYDROMASSAGE SYSTEM,
OZONATOR, CHLORINE GENERATOR, UV LAMP

Garden hot tubs with laminate shells made of resins used for the production of pools and yachts are a perfect solution to ensure cleanliness and facilitate the maintenance as much as possible. A hot tub with a laminate shell is a solution that ensures 100% leaktightness without the necessity to keep water in the tubs, as the laminate does not dry out. The thickness of walls is 6 cm at average and comprises of an external wood layer and the internal laminate as well as thermal insulation made of polyurethane foam between these layers.

EQUIPMENT

Equipment: stove with stack, wooden stove cover, stairs for entering (single platform in BW-23), stainless steel bands, natural non-treated wood. In case of BW-19 and BW-23 two kinds of stoves are available: internal and external. BW-19P and BW-23P have a stove installed under the bench. BW-12 and BW-14 are available with a stove installed under the bench only. A hydromassage system is available in BW-19 and BW-23 at an additional fee. For the remaining equipment for hot-tubs, see: hot-tub accessories.

BRINE GRADUATION TOWERS

LEARN MORE!

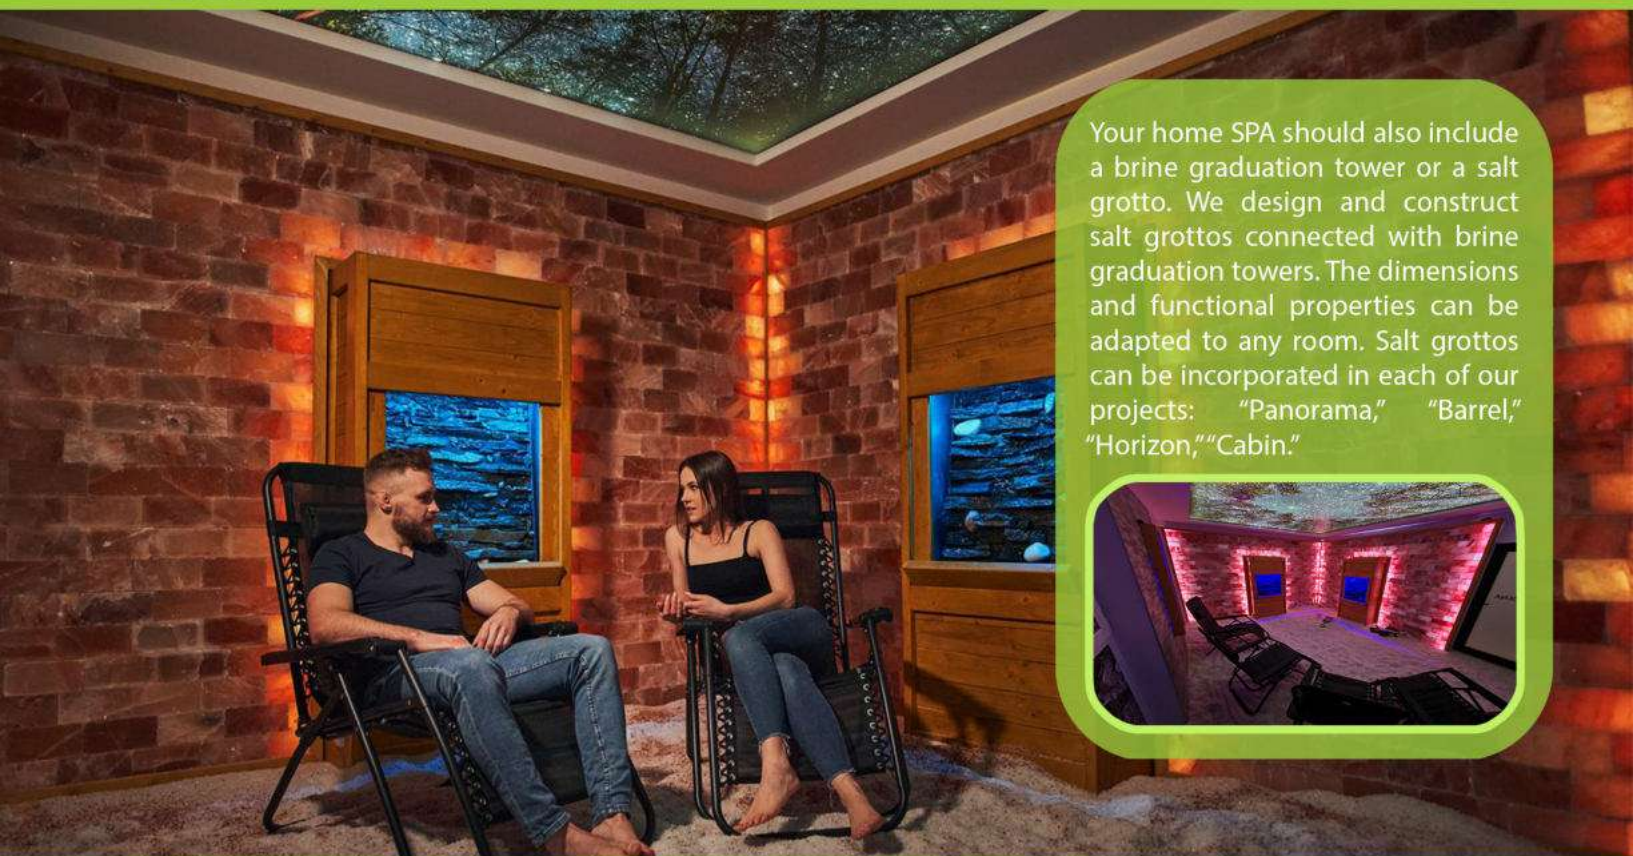

Balneology is one of the oldest medical practices applied in health resorts. It is preoccupied with the study of healing properties of underground water, brines and therapeutic mud, especially in the therapy of chronic diseases. The brine graduation towers may be applied at home and in a professional SPA, in salt grottos and relaxation rooms after warm baths and sauna sessions.

EQUIPMENT

Brine graduation tower with dimensions of 40 cm x 80 cm x 190 cm, made of spruce, larch or Siberian cedar. The graduation tower is complete and includes: a brine container, stainless-steel pump, led lighting with a remote. The brine should be prepared by own means using Wieliczka or Ciechocinek salts. The best salt to make brine is a salt with high content of microelements and iodised.

SALT GROTTO

Your home SPA should also include a brine graduation tower or a salt grotto. We design and construct salt grottos connected with brine graduation towers. The dimensions and functional properties can be adapted to any room. Salt grottos can be incorporated in each of our projects: "Panorama," "Barrel," "Horizon," "Cabin."

EQUIPMENT

Equipment: walls made of salt brick with LED backlight. Floor made of loose coarse salt.
